

Benchmarking

Considering both the technical strategy and roadmap together, we compare our findings to the emerging trends within the industry.

Architectural workshops

We identify the key components of your end-to-end plan and fit it within the wider solution architecture.

Strategy Review

We provide you with an independent third party assessment of a vendor or institutional technology strategy and current state assessment.

Roadmap

We help you in designing a pragmatic and achievable technology roadmap for phased migration to the target state.

Briefings

Our briefings are tailored to you. Choose between broad technology discussions on trends and insights or highly focused sessions on tools and technologies.

ROI modeling and optimisation

We develop ROI models with our vendor clients to test the impact of their proposed solutions. This allows them to demonstrate value and subsequently means the end-users build economically-informed business cases for their technology strategies.
